Thank you for the information Paul – sorry I missed speaking with you yesterday. I was in meetings most of the day after being out of the lab for a few days vacation and a few days to recuperate from Strep throat that one of my little sweeties passed along to me.

They have already picked up one load of coolers this morning and have indicated they would be back for the remainder in about 30 minutes.

Christy, Sorry to have missed you today. Sample IDW10 was for our TCLP suite and was collected from solids IDW drum IDW10 SO which contained spoils from SB9. We will have SB9 soil sample data (from 4-10-14) at that location for use in waste disposal determinations. We will also double check with our disposal

company as to their analytical requirements. A cooler pick-up request was submitted again today and I understand they will be out there at the EPA Lab tomorrow. I will forward more as soon as I get additional information. Additionally, to follow up with our conversation last week. The offset soil boring locations staked by EPA (for replacement to our original borings SB15-17) correspond as follows:

SB17/MW17 was off set and resampled as SB21 on 04-14-14.

SB16/MW16 was off set and resampled as SB20 on 04-14-14.

SB115/MW15 was off set and resampled as SB19 on 04-14-14

Please let me know if the coolers are not picked up by 1 and I will follow up with them.

Thank you

Paul Kieler

Sorry for the delay in sending the following information on the last shipment of samples – I was out of the office through Tuesday of this week.

In the last shipment of samples in Cooler 28 we received sample IDW10 which was not listed on the COC.

We also have the remainder of your coolers that need to either be picked up or we need return airbills in order to ship them to you.

Thanks.

Christy Warren
